Review article

Food-borne heterocyclic amines. Chemistry, formation, occurrence and biological activities. A literature review
G. Eisenbrand, W. Tang (Kaiserslautern, Germany) 1–82

Effects of 20 months of ozone exposure on lung collagen in Fischer 344 rats **(Chronic exposure of rats to ozone causes mild persistent pulmonary fibrosis)**
J.A. Last, T. Gelzleichter, J. Harkema, W.C. Parks, P. Mellick (Davis, CA; Albuquerque, NM; St. Louis, MO; Richland, WA) 83–102

Lung deposition, lung clearance and renal accumulation of inhaled cadmium chloride and cadmium sulphide in rats **(An encyclopedic distribution study showing that lung clearance of the insoluble sulfide is more rapid than that of the soluble chloride)**
H-J. Klimisch (Ludwigshafen, Germany) 103–124

The penetration of 2,3,7,8-tetrachlorodibenzo-*p*-dioxin into viable and non-viable porcine skin in vitro **(Loss of viability, removal of the stratum corneum and lipid carrier-free application increase uptake into skin)**
L.W.D. Weber (Neuherberg, Germany; Kansas City, KS) 125–140

Effect of microsomal enzyme modulators on *N*-(3,5-dichlorophenyl)-2-hydroxysuccinimide (NDHS)-induced nephrotoxicity in the Fischer 344 rat **(Phenobarbital enhances NDHS induced nephrotoxicity, whereas piperonyl butoxide or $CoCl_2$ have no such effect)**
K.W. Beers, D.W. Nicoll, D.K. Anestis, P.I. Brown, G.O. Rankin (Huntington, WV) 141–155

Glutathione depletion in human erythrocytes as an indicator for microsomal activation of cyclophosphamide and 3-hydroxyacetanilide **(For both compounds metabolic activation is necessary to achieve GSH depletion)**
N.G.M. Palmen, C.T.A. Evelo (Maastricht, Netherlands) 157–170

Hepatotoxicity of piperonyl butoxide in male F344 rats **(Description of time-response and dose-response over a 12 week period)**
T. Fujitani, Y. Tada, M. Yoneyama (Tokyo, Japan) 171–183

Pathogenesis of 2,2′-dichlorodiethyl sulfide in hairless guinea pigs **(NAD^+ depletion does not appear to be a major factor in the pathogenesis of dermal injury)**
J.J. Yourick, J.S. Dawson, C.D. Benton, M.E. Craig, L.W. Mitcheltree (Aberdeen, MD) 185–197

Effects of 2-[1-(ethoxyimino)propyl]-3-hydroxy-5-(2,4,6-trimethylphenyl) cyclohex-2-enone on hepatic haem biosynthesis: species differences in hepatic porphyria **(ETC strongly inhibits ferrochelatase not in rats but in mice causing accumulation of protoporphyrin IX)**
A.M. Brady, R.L. Hasmall, B.M. Elcombe, E.A. Lock, F. De Matteis (Macclesfield and Carshalton, UK) 199–215

Chlorate poisoning: mechanism of toxicity **(Methemoglobin formation, enzyme denaturation and crosslinking of proteins are the main mechanisms of toxicity**
C. Steffen, E. Wetzel (Seestraße and Marburg, Germany) 217–231

Book Review 233–234

Announcement 235
